🏆 Achievements

- Constructed a captivating website for EcoWrap.inc leveraging Bootstrap, significantly amplifying the company's online visibility and brand reputation.
- Successfully executed the development of a cutting-edge waste-management application utilizing React Native and Node.js, aligning with the company's dedication to sustainability.
- Spearheaded the development and upkeep of company websites, resulting in a remarkable sales surge of over 20%.

💼 Work Experience

Jan 2021 – Dec 2021 | Technical Engineer
The Chaya Chitra, Jaipur, Rajasthan

Key Result Areas:

- Monitoring daily communication with an average of 20 clients, ensuring their needs and requirements are fully addressed.
- Also, I developed and maintained the company's website. Which led to a 20% increment in our sales.
- Also, I worked on refining my skills in Photo and Video editing. (Adobe Photoshop & Premiere)
- Implementing a Customer Relationship Management System, resulting in improved client satisfaction and retention rates.

⚙️ Internship

May 2019 – Jul 2019 | Intern
Bodhisatva Artificial Intelligence, Jaipur, Rajasthan

Key Result Areas:

- Implemented a waste-management app using React Native and Node.js.
- Built a website for EcoWrap.inc using Bootstrap.

⚙️ Projects Executed

Fiesta La Blanc
React.js

➡️ Developed a dynamic restaurant menu web application using React.js, providing an engaging and user-friendly interface for customers to explore the restaurant's offerings.

Demo: https://restaurant-react-app-rust.vercel.app/

Code: https://github.com/Vargos98/restaurant-react-app

iTunes Clone
HTML, CSS, JQuery

➡️ Cloned & customized a web project inspired by iTunes, showcasing strong front-end development skills and user interface design expertise.

Demo: https://itunes-clone.vercel.app/

Code: https://github.com/Vargos98/Itunes-clone

Grid Notes
React.js

➡️ Designed & developed a user-friendly note-taking application using React, implemented a responsive grid layout for organizing and visualizing notes, Utilized Reacts state management and components to enable dynamic note creation, editing, and deletion.

Demo: https://grid-notes.vercel.app/

Code: https://github.com/Vargos98/grid-notes

Anime Pro
React.js

➡️ AnimePro is a React project that leverages the Jikan API to create a sleek and user-friendly interface for exploring anime information. Users can search for their favorite Anime titles, view detailed information about each series, including synopsis, release date, and genre. With AnimePro user can keep a track of their watchlist.
