Summary: Full-Stack Developer with 2+ years of experience building scalable production web applications, Jira-integrated SaaS platforms, and dynamic UIs. Proven expertise in the MERN stack, scalable Node.js architectures, and database optimization strategies. Highly capable of incorporating robust CI/CD, Kubernetes orchestration, and system monitoring tools like Prometheus and Grafana. Complemented by a strong QA foundation, ensuring high-quality software delivery through manual functional, regression, and smoke testing, alongside comprehensive API validation and testing within the MERN stack.

Full-Stack Developer - Gudakesa Pvt Ltd

May 2025 – Present

Jira-integrated enterprise SaaS platform | Turborepo monorepo | Production web apps

- Engineered the **Reporting Center** module, implementing **Test Coverage, Test Run Analytics, and Test Plan Metrics** using stacked bar charts, multi-filter controls, and real-time data aggregation. ([link](#))
- Developed and maintained **18+ micro-frontend modules** (including issue panels, project pages, and admin settings) utilizing a **Turborepo monorepo** architecture.
- Collaborated with engineering teams in **Agile sprints** to ensure secure, **encrypted API** communication and **GDPR-compliant** data handling for **multi-tenant SaaS production environments**.
- Built and Validated **20+ REST API** integrations using **Postman** and **Chrome DevTools** to verify status codes, payloads, error handling, and UI-API consistency.
- Guaranteed feature stability across the platform by performing end-to-end user journey validation, encompassing **manual functional, regression, smoke, and exploratory testing**.

React Developer - Gudakesa Technologies

June 2023 – Jan 2025

Jira ecosystem integration | Web panels & pages | Agile / CI/CD

- Built and seamlessly integrated **10+** Jira-connected web panels and pages utilizing **React.js, TypeScript**, and the **Atlassian Forge CLI**.
- Developed highly responsive and accessible UI components across desktop and mobile viewports, adhering strictly to **Atlassian design standards**.
- Created detailed feature workflows and technical documentation for Jira-integrated panels using **Confluence** to accelerate team onboarding and ensure reliable testing.
- Verified **REST API** mapping, success/error states, and frontend display accuracy to maintain software quality during iterative sprint cycles.
- Documented test scenarios and feature flows for Jira-integrated panels to enable consistent testing across releases.

Technical Engineer - The Chaya Chitra

Jan 2021 – Dec 2021

- Redesigned the company portfolio website and validated UI, navigation flows, and **responsive behavior** across devices following **HTML, CSS, JavaScript**, and **Bootstrap** enhancements.
- Gathered client requirements and acted as the primary contact for **UAT-style validation** and **production issue triage**.
- Tested **cross-browser layout** and form behavior during website enhancements.
- Supported **100+** clients with technical issues, documenting fixes and communicating resolution steps clearly.

- Built and tested a **React Native** mobile application (**Android/iOS**) for real-time waste reporting, ensuring seamless form submission and API connectivity.
- Tested **Node.js REST API** integration between the mobile app and backend, verifying request/response behavior and **error handling**.
- Performed **mobile functional testing** on emulators and physical devices, checking installation, permissions, and network behavior.
- Validated **responsive design** and cross-browser behavior for EcoWrap Inc. landing page (HTML5, TailwindCSS, GSAP, and Locomotive Scroll) ([link](#))

Side Projects

[OhMegal.com](#)

- Node.js application with webRTC and Socket.IO
- Tested real-time connection flows, chat/video functionality, and server-side API behavior during development.

Skills

Frontend: React.js, TypeScript, Redux, Zustand, Tailwind CSS, Material UI, Ant Design, Atlassian.

Backend: Node.js, Express.js, MongoDB, PostgreSQL, REST APIs.

DevOps & Tools: Git/GitHub, Turborepo, Docker, CI/CD, AWS (basic), Postman, Forge CLI, Jira, Confluence, Chrome Devtools.

AI/ML: LLM Integration, Prompt Engineering (Exploration).

Education

Bachelors - Computer Science & Engineering

June 2017 – Jun 2021

JK Lakshmipat University
